FRONTLOAD:

"THIS will be a NEW target for you. IT IS A RECURRING target of some importance. it is best if you Acquire the site and begin by first reporting on the general area at which time I will move you to the specific. USE CRV terminology to relay impressions if you feel more comfortable using those terms i.e. AOL, AL, etc. I will occasionally request further clarification of a target component by simply STATING "RAW DATA" OR "MORE DATA!" Rarely will I use full sentences and never will I use long narratives. USE the concept of sanctuary to assist you in your mission and don't worry about moments of silence when you might feel "obligated" to report. Observe the site and report only your impressions without trying to identify specific components. Continue to relax throughout the session and enjoy --- H

* Some sporadic heating noises -- Not critical

NOTES:

- ② Source appears more confident & relaxed
